# Iranian power and telecommunications fiber optic cables

## Overview

---

WANA (Aug 09) - The CEO of the Telecommunication Company of Iran (TCI) has announced the launch of a national fiber optic mega project that will replace all copper cables in the country within five years, providing high-speed connections to 27 million subscribers. Subsea cables are fiber-optic or electrical cables laid on the sea floor to transmit data and power. US forces patrol the Arabian Sea near M/V Touska on April 20, 2026, after firing upon the Iranian-flagged vessel that the US accused of. SINET is a specialist business internet service provider that offers high-speed, dedicated broadband solutions using advanced technologies like optical fiber connections, ensuring stable internet connectivity with speeds up to 1,000 megabits per second. 6Wresearch actively monitors the Iran Fiber Optics Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market dynamics. Established in 2017, our company is one of the few companies in Iran which manufactures different types of fiber optic cables and accessories (as well as network and telephone cables).
