

# **Is it normal for the router s fiber optic cable light to be purple**

## Overview

---

Q: Is it normal for router lights to change colors during startup?

A: Yes - routers cycle through different colors during boot sequence. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. What to check: Make sure the power cable is securely plugged into both the ONT and a working wall outlet. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. If your router light is flashing, this means that the service is initialising or that data is being exchanged (i.
