

# **Kenya wired fiber optic transmission**

## Overview

---

It's a 10-billion-shilling program launched by Kenya's government to offer 100,000 km of fibre optic cables to every nook and corner within the country's borders. The objective is to improve connectivity, especially in underserved and high-risk areas. In the construction of electricity transmission lines, we incorporate Optical Ground Wire (OPGW) technology for operations. The Communication Authority of Kenya (CA) in September 2014 granted us a Network Facility Provider Tier 2 (NFPT2) license to lease excess fiber to licensed operators in Kenya. Liscom systems Ltd solutions offers full integrated solutions for fiber optics communications in Kenya, with in-depth expertise in Fiber-To-The-X (FTTX) designing, cost effective network optimization, wide range of unique cross-vendor products and customized products offering, network integration. Fibre Optic Cabling is becoming the preferred the industry standard for fast amounts of data quickly and over long distances without any latency involved.
