

Latest Certification of Low-Voltage Complete Sets of Equipment

Overview

CE LVD is a mandatory EU safety certification for low-voltage electrical equipment. The low voltage directive (LVD) (2014/35/EU) ensures that electrical equipment within certain voltage limits provides a high level of protection for European citizens, and benefits fully from the single market. This is the most accurate, up-to-date overview of CE LVD for 2026, based on daily compliance work. On the 22nd of July 2025, the European Commission published the Commission Implementing Decision 2025/1488, which amends the Implementing Decision 2023/2723 to published.
