

Latest Standards for the Manufacturing of Distribution Boxes in Suriname

Overview

In April 2026, five new international standards were released, setting higher benchmarks for dimensional consistency and recyclability practices. The Suriname Standards Bureau (SSB) is responsible for developing and implementing standards and technical regulations, for certification of goods and processes, for metrology, and for accreditation of laboratories and testing facilities. Warehousing and logistics play a critical role in the economic framework of Suriname, serving as the backbone of international trade and local distribution channels. All products must have labels written in Dutch, the official language of Suriname. Suriname, with its rich natural resources and diverse economy has seen a growing interest in ISO certifications.
