

# Low-loss installation solution for UK small busbars

## Product Composition Description

## Overview

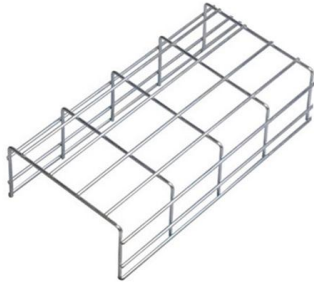

---

Busbar trunking is a wiring management solution that can be used in both single phase and three phase circuits. It's an efficient alternative to traditional cable that's adaptable, durable, safe, easy to install and cost-effective. Busway systems offer a flexible, compact, and efficient method for distributing power in industrial and commercial areas. For busbar design and installation in the UK, our specialised electricians from A&T Enclosures are required, while our busbar installers can easily install up to 10 meters of busbar at a time without the use of specialised gear.
