

Low-loss liquid-cooled power supply 2025 model

Overview

Key features of the showcase include complete power solutions for both 800 VDC and ± 400 VDC power architectures, the newly-launched liquid-to-liquid (L2L) CDU with 2,000kW of cooling capacity for new AI data centers, the new 300kW liquid-to-air (L2A) CDU for. , October 6th, 2025 — Delta, a global leader in power management and smart green solutions, will present its next-generation of highly integrated high-voltage DC power distribution, advanced precision cooling, and networking solutions for AI data centers at the OCP Global Summit. The iHP20S Liquid Cooled precision AC-DC configurable power supply is 100% digitally controlled in a 757.8 mm package and provides eight individual slots that accept intelligent DC-DC converter modules. Its cooling is handled by the PC's custom liquid cooling setup, which means that. The PSU channels coolant through heatsinks that come into contact with the hottest components, such as switching MOSFETs, Schottky diodes, APFC, IGBTs, and more.
