

Method for stripping the pigtail from the Fiberglass box

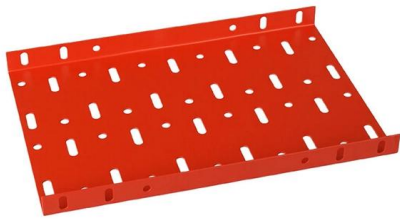

Overview

Using your fiber strippers, remove these layers in small, controlled increments. The pigtail is a high-quality optical assembly manufactured using custom connectors to accommodate another fiber cable in a tray, rack or splice closer. These factory preterminated flat drop pigtails are the industry standard for existing FTTx installations. If you're new to fiber optics or want to enhance your technical skills, this guide will help you understand how to splice fiber pigtails safely and efficiently.
