

Methods for storing fiber optic patch cords in a computer room

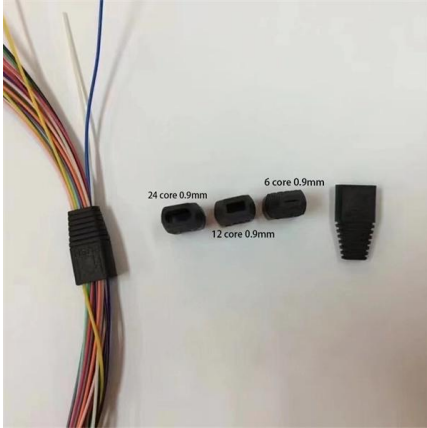

Overview

Boxing jumpers simplifies maintenance, reduces the frequency of replacement and repair, permits readily visible inventory coding and provides quick access to the jumpers. Effectively arranging optical fiber optic patch cords in a cabinet is a critical aspect of maintaining a streamlined and organized network infrastructure. Different kinds of patch panel meet the demand to effectively manage high-density structured cabling in different applications. For the integrated wiring, the telecommunication room and the equipment room are the gathering places of the three types of services of data, voice and image, and its importance is self-evident. Here are some straightforward tips to help you properly handle and store your cables.
