

# **Mexico Multimode 10 Gigabit Optical Cable**

## Overview

---

These fibers easily support applications ranging from Ethernet (10 Mbit/s) to gigabit Ethernet (1 Gbit/s) and, because of their relatively large core size, were ideal for use with LED transmitters. Overview Multi-mode optical fiber is a type of mostly used for communication over short distances, such as. The IEC 61280-4-1 (now TIA-526-14-B) standard defines encircled flux which specifies test light injection sizes (for various fiber diameters) to make sure the fiber core is not over-filled or under-filled to allow more.
