

Multimode dual-core optical cable

Overview

Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be propagated and limits the maximum length of a transmission link because of modal dispersion. Overview Multi-mode optical fiber is a type of mostly used for communication over short distances, such as.

Multi-core Fibers - dual core, twisted, space division

By combining multiple cores for multiple signals into a single multi-core fiber with a 125 micron diameter, designers have a new capability not offered by single fibers.

Fiber Optic Cables

CommScope designs and manufactures a comprehensive line of fiber optic cables--from outside plant to indoor/outdoor and fire-rated indoor fiber cables.
