

# **Network Security Equipment Acceptance Report**

## Overview

---

View our free and editable Equipment acceptance report templates for Excel or Google Sheets. This Permanent Reference Document is classified by GSMA as an Industry Specification, as such it has been developed and is maintained by GSMA in accordance with the provisions set out in GSMA AA. This document contains detailed requirements and further information as a supplement to the higher-level document "Verfahrensbeschreibung zur Zertifizierung von Produkten, Prozessen und. The Trusted Platform Module (TPM), as defined by the Trusted Computing Group (TCG), is a small security coprocessor that can be a standalone component or included as part of another component, such as a microprocessor. As an MSP, your role is to ensure your client's network operates without a hitch. It provides guidance to support public telecommunications operators (the providers of Public Electronic Communications Networks and Services), in meeting their duties under the Telecommunications (Security) Act 2021. While the highlights are listed below, a more detailed view of each section follows.

## Network Security Equipment Acceptance Report

---
