

Network cabinet IP20 protection level

Overview

An indoor cabinet with an IP20 rating is an enclosure rated under IEC 60529 for protection against solid-object ingress at the 12. The IP Rating System, also known as the Ingress Protection Rating System or International Protection Rating System, is a standardized classification system that measures the degree of protection provided by mechanical casings and electrical enclosures against intrusion, dust, accidental contact. Our high quality IP cabinet variants protect your sensitive instruments from dust, moisture, dirt, and unauthorised access.
