

Network cable and fiber optic integrated patch panel

Overview

A fiber patch panel is a mounted enclosure—either rack-mounted or wall-mounted—used to terminate, manage, and interconnect multiple fiber optic cables. It acts as a hub for organizing splices and patch cords, streamlining fiber management and preserving signal integrity. They serve as the central point where feeder cables, distribution lines, and active equipment ports meet. Leviton offers the industry's largest selection of high-quality copper and fiber optic patch panels to support the latest technologies and provide ideal configurations for unique applications.
