

# **Network rack equipment installation location**

## Overview

---

A well-chosen spot reduces cable clutter and enhances your network's performance. When planning your rack installation, one of the first things to do is to select the right rack type and check that its size suits your equipment and future additions. If you plan to use the rear cable management bracket, allow 8 rack nits (14 inches or 35. Before using a particular rack, check for obstructions (such as a power strip) that could i. Networking equipment housed within the server rack should be installed in the upper portion of the cabinet to simplify cable management. In this video I show you how I mounted a Tripp Lite SRW12US SmartRack 12U Wall Mount Rack Enclosure Cabinet.
