

No sound from the audio fiber optic splitter

Overview

Ensure the optical audio splitter supports simultaneous output to both devices. The problem is that there is no sound on the speaker from the tv when i use this splitter. The splitter can recieve pcm signals and thats what I have chosen in the sound options on my TV. Unlike other transmitters, the MR270 uses the latest Bluetooth AptX Low Latency HD, to listen to high-quality sounds without any delay.

No sound from the audio fiber optic splitter

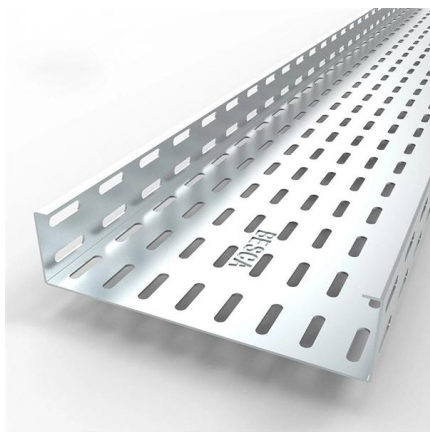

Will a fiber-optic cable splitter negatively affect audio output

I just bought an X-Box that requires a Toslink cable for surround sound. The problem is I dont have an open fiber-optic input on my receiver. I would like to use a simple 2 way fiber-optic

Exploring the Possibilities: Can Optical Audio Be Split?

Yes, you can split an optical audio signal using an optical audio splitter. These devices are specifically designed to take one optical audio input and distribute it to multiple outputs, allowing you

Expert Solutions for Optical Audio Splitter Issues

The signal from the splitter powers the soundbar fine, but there's no signal from the converter reaching the amplifier, resulting in no sound from the auxiliary speakers.

Analog to digital fiber optic audio and audio converter, 3.5mm jack

TV aux to optical for sound bar: Supports uncompressed 2-channel PCM digital audio signal output, Supports output sampling rate at 44.1K, 48K, 96K audio sampling rate Automatic encoding

I've even tried two different brands of splitter, but both have the same effect. I've even removed the soundbar cable and just connected the headphones through the splitter, and nothing.

Line input and fiber optic input equipment have no sound

If after attempting these steps, the line input and fiber input on the IEAST audio device still have no sound, it may indicate a hardware issue. In this case, it is recommended to contact our
