

ODN optical fiber cable

Overview

ODN, an integral part of the PON system, provides the optical transmission medium for the physical connection of the ONUs to the OLTs. An Optical Distribution Network (ODN) is an important component within fiber access networks (FTTx). The ODN is responsible for carrying optical signals from the Optical Line Terminal (OLT) in the Central Office to the end-user's Optical Network Terminal (ONT). Ever since its foundation in 1971, Cablescom has co ups due to the reliability and quality of its products. It has its own core R&D team and production factory, providing high-quality products, excellent service and satisfactor ODN is the abbreviation of optical.
