

P Distribution box corrosion protection

Overview

Therefore, certain measures should be taken to prevent the distribution box from corrosion. These specialized electrical enclosures are engineered to protect critical wiring systems, circuit breakers, and control components from corrosive substances that would rapidly degrade conventional materials. Pepperl+Fuchs provides a specialized portfolio of Ex d (flameproof) and Ex tb (dust protection by enclosure) certified terminal boxes and junction boxes engineered for reliable use in explosion-hazardous areas. These sturdy solutions are certified according to global standards such as ATEX, IECEx. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. Manufacturer of Corrosion resistant industrial enclosures ISO 12944: C1, C2, C3, C4, C5 and CX (extreme corrosion stress) offshore in.
