

# **Primary Distribution Box Construction Site Transparent Panel**

## Overview

---

The Waterproof Electrical Distribution Box, with its high-definition transparent cover, is a transparent panel that not only allows for easy monitoring of the internal components, but also enhances the overall aesthetics, making it perfectly suited for functional applications. This sheet metal part commissioned by a US customer has a high degree of customization and requires precise manufacturing processes to meet the customer's requirements. Built from durable ABS plastic with a clear lid, this IP65-rated breaker box safeguards against dust, water, and impact damage. ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. Intelligently designed plastic housing with cross-divided inlet and outlet openings integrated within its bottom and cover facilitate in combination with the folding strain relief clamps effortless, time-saving connection of the distributors. Gewiss' ACS system perfectly combines the various elements of the boards (casing, energy socket-outlets and protection devices) to guarantee the excellent electric and design coordination of conditions.

## Primary Distribution Box Construction Site Transparent Panel
