

Recommended Fiber Optic Sensor Accessories

Overview

From high-quality fiber-optic amplifiers to rugged optical fiber cables and matching accessories. In combination, these perfectly matched components enable high efficiency and precision in demanding detection tasks. Our global manufacturing network for fiber optic sensors in Ayabe (Japan), Shanghai (China) and Nufringen (Germany) focuses on continuously optimising methods for small and large volume production, applying stringent quality control procedures, and expanding production portfolio and flexibility to. We offer a full range of accessories that connects, holds, adapts and manipulates Ocean Optics optical fibers. These are reliable and easy-to-use devices that have high power, can automatically adjust to real-time conditions, and have a straightforward display that eliminates any guesswork. Fiber optic patch cables, also known as jumper cables or fiber patch cords, serve as the lifelines of a fiber optic network, connecting various devices and ensuring the smooth flow of data. They come in different types, primarily single-mode and multi-mode, each designed for specific applications.
