

Return Flow Splitter

Overview

This article highlights top return flow splitter valves commonly used in fuel and hydraulic systems. Each product is evaluated for compatibility, flow capacity, and installation ease to help you select a reliable valve for dual-flow or return-line applications. Norgren GT Development's Return Flow Splitter is used in many of today's Class 8 vehicles to evenly distribute return flow of fuel to the fuel tanks, eliminating the need for a crossover line. Constructed with robust zinc die-cast materials, it ensures durability and reliability.
