

# **Router Fiber Optic e Blue**

## Overview

---

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium. Fiber optic connectors are devices used to terminate the end of an optical fiber and enable quicker connection and disconnection than splicing. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. With the many options available on the market, picking the best router for fiber internet can be tricky.
