

Router connected to EOC terminal box cannot access the internet

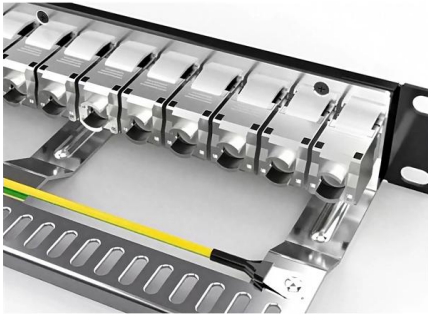

Overview

Solutions: Verify WAN Interface Status: Ensure the WAN interface is "Running" and has a valid public IP address. EOC1121R4WL-R410 serial terminal device is used to structure two layers of Ethernet transmission channel in CATV Cable network, transmit and receive Ethernet signal through cable coaxial cable, and do not affect the original CATV signal. Connect the ISP cable to the router's ether1 port and connect your PC to any port except ether1. Then, launch WinBox and search for your router using the neighbor discovery feature. 1 in the browser address bar, I'm unable to get router access, the page just won't open and I'm not even reaching password screen whereas earlier I used to access for this same router. Symptoms: You are unable to connect to the MikroTik router via WinBox, web interface, or SSH.
