## Overview

---

The Cisco Meraki MS450 brings powerful high-bandwidth switching to the aggregation layer. The 40G fiber aggregation switch with 100G uplinks adopts the benefits of the cloud with simplified management, reduced complexity, and network-wide visibility. ONIE provides the option to install a preferred Network Operating System, such as Pluribus Netvisor OS, or activate the pre-loaded D-Link OS. Where is the missing Mikrotik 40G aggregation switch?

I have quite a lot of Mikrotik gear at work in a lab, testing and simulating all sorts of ISP equipment.
