

# **SFP and GPON optical modules**

## Overview

---

In the rapidly evolving landscape of fiber-optic communications, GPON ONU SFP modules represent a critical technological convergence. These compact, hot-pluggable transceivers are engineered to deliver high-speed data, voice, and video services over Gigabit-capable Passive Optical. GPON SFP modules differ from standard SFP modules because, rather than point-to-point links, a GPON SFP connects an Optical Line Terminal (OLT) to multiple. GPON (Gigabit Passive Optical Network) has transformed how homes connect to high-speed internet, offering scalable bandwidth, low latency, and efficient fiber infrastructure.
