

Seeking to purchase optical fiber cable manufacturing equipment

Overview

Key optical fiber manufacturing equipment includes drawing towers for creating the fiber, coloring and buffering lines for protection and identification, stranding machines (like SZ stranding lines) to assemble the cable core, and jacketing lines to apply the final protective. BM-Rosendahl is the global supplier of production equipment for lead-acid and lithium-ion batteries. Superior bearings and frames, coupled with an innovative low-tension process, ensure no project is too difficult or too sensitive to accomplish—even those involving bend-sensitive and multimode fiber. Roblon's long-term experience and knowledge of cable fibers and cable machinery offer our customers a wide range of benefits, as we hold the necessary expertise about both the manufacturing of the fibers and how to use the materials for cable manufacturing.
