

Should I connect my home broadband to fiber optic or cable

Overview

cable internet speeds, reliability, and costs to find the best network connection type for your needs. Technically, both can reach 10,000Mbps (10Gbps)—cable internet's overall design just needs to catch up with fiber. Currently, two major broadband technologies dominate the market: traditional cable and lightning-fast fiber-optic networks. Choosing the right internet connection for your residence can be confusing, especially since there are multiple options on the market. Fiber brings lightning-fast speeds and rock-solid reliability, while cable offers wide availability and affordable plans. Yet it's not all about performance; coverage, cost, and your family's online habits.
