

Splitter Indicator

Overview

Sharp price fluctuations are ignored, as well as noise around average prices. A very very basic document to illustrate what purpose the Splitting Indicator serves in planning and how to infer the planning results during its usage. Starting point is Forecast-based planning which is on the basis of past material consumption and this procedure helps to come out with an output. It displays signals in blue (sell) and red (buy) histograms, identifying potential market reversal points without redrawing.
