

Swedish rack power distribution system IP67

Overview

It has 12 locking IEC C13 and 12 locking IEC C19 receptacles and a 3P+E IP67 plug providing 17. Outlet-level power monitoring offers quick access to critical power usage information down to the device level to evaluate energy usage trends and maximize uptime. Power supplies for installation in 19" mounting frames and 19" cabinets are easy to mount and meet the 19" system's requirements for length, width and height. Outlet Level Monitored Rack PDU VP6N60A1 is a 60A, 208V Delta 0U vertical with input and outlet level power monitoring. The Power Distribution Unit (PDU) is designed for incorporation into each rack of a data centre. Within the rack, the PDU delivers the necessary power supply for the server and network components via a given number of suitable connector sockets.
