

Telecom fiber optic router settings prompt static IP

Overview

Find DHCP reservation — look under "LAN", "DHCP", or "Address Reservation". This article contains example configurations you can use to help you set up your network with static IP addresses. Most routers provide a dynamic IP address by default, which means that this address can change every time the router is rebooted or connected to the network. Routers both modern and antiquated allow users to set static IP addresses for devices on the network, but what's the practical use of static IP addresses for a home user?

Read on as we explore when you should, and shouldn't, assign a static IP.
