

The connector box that can be removed in the middle

Overview

An electrical box knockout is a pre-stamped, partially cut section designed to be removed only when necessary for wiring installation. These removable disks or slugs maintain the box's structural integrity while allowing flexibility in cable entry points around the perimeter. [com/insulation-displacement-connectors](https://www.electrical.com/insulation-displacement-connectors) I've an automatic wire stripper like this:  Picture from [It basically does what suggests and cuts /](#). These connectors are often found in larger devices such as printers, projectors, or games consoles. Tool or easier method to strip a thin wire in the middle : [r/diyelectronics](https://www.reddit.com/r/diyelectronics) This subreddit is dedicated to both amateur and professional engineers that want to build cool stuff at home, challenge themselves to learn new technologies, learn from each others' designs, and showcase their side.
