

The distribution box needs to be 3C

Overview

A reliable home distribution box must meet these standards: Certification : Look for IEC 60439-1 (international) or your region's equivalent (e. While "3C" is China-specific, Lianxinda's export models comply with global safety protocols. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1.4m). 4kV to the distribution cabinet (primary distribution cabinet), then the outgoing line is led to the distribution box (secondary distribution box) in each building, and finally the outgoing line is led to the distribution cabinet. The length of the bolts is generally the sum of the embedded depth (75-150 mm), the thickness of the box bottom plate, the thickness of the nuts and washers, plus the "overhanging allowance" of about 5 mm. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs.
