

UAE Fiber Optic Cable G 657A2

Overview

The G657 A2 cable is constructed with two single mode fibres protected by dielectric strength member made of fibre reinforced plastic (FRP) strength member and LSZH outer jacket. ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. The COMX G657A2 Singlemode Bare Fiber Cable sets the industry standard for installation flexibility and reduced sensitivity to bending, making it an ideal choice for challenging environments including in-building pathways. As Fiber to the Home (FTTH) networks expand, technicians frequently encounter different fiber standards in the field—most notably ITU-T G.
