

Ukrainian Galvanized Cable Trays Trough Type

Overview

Trough Type Galvanized Cable Tray is a fully enclosed cable management system, typically made of Q235 steel with hot-dip galvanized coating for corrosion resistance. One of the activities of the company are galvanized metal cable channels (cable trays), designed to strip cable and wire. Its rectangular trough shape with removable cover shields cables from dust, moisture, and electromagnetic interference. Its "trough" design—often featuring a solid or partially enclosed bottom—provides an effective barrier against. Our cable trays are manufactured from robust materials and rigorously tested to ensure they can withstand even the most demanding environments.
