

Unit Box Optical Cable Fixing Operation

Overview

ODF Unit, Optical Fiber Splice Distribution box, or Optical Distribution Frame unit, is applied in introducing, fixing and protecting the optic cable, splicing fiber termination with pigtails. The information contained in this manual should serve as a guide to proper handling, installing, testing, and for troubleshooting problems with fiber optic cables. Optical fiber terminal boxes and ODF unit boxes, optical fiber terminal boxes are widely used in network systems, data, image transmission systems, CATV cable TV series, used for direct connection and branch connection of indoor optical cables, and play the role of pigtail storage and protection of. Failure to comply with the instructions below will render all certifications INVALID. The EXJB may not be modified ElectroStatic Discharge) applications or superior (see marking below). The quantity of units and flange tray is optional according to the user's actual needs.
