Cascaded learning with transformer for simultaneous eye landmark,

In this paper, we address the limitations of existing methods by proposing a unified framework for simultaneous eye landmark detection, eye state detection, and gaze estimation.

Advances in medical image analysis with vision Transformers: A

The rapid adoption of Transformers in the medical imaging field necessitates a comprehensive summary and outlook, which is the main scope of this review. Specifically, this review

EmMixformer: Mix transformer for eye movement recognition

To this end, we propose a mixed block consisting of three modules, trans-former, attention Long short-term memory (attention LSTM), and Fourier transformer. We are the first to attempt leveraging

Classification of Eye Diseases in Humans Using Vision Transformer

The eye is a very important sensory tool of living things, especially in humans. Where if the eye retina is damaged or affected by disease, especially cataract eye disease, the quality of the eye retina cannot

Uruguay November 2024: BYD (+241.2%), Citroen

BYD signs the best performance in the Top 10 in November. It's another very solid month for new light vehicle sales in Uruguay with November up

Multi-stage framework using transformer models, feature fusion and

Our approach leverages transformer models, hybrid models, feature selection methods, and ML models, leading to robust decision-making. It aims to improve accuracy and generalization in

A hyper-tuned Vision Transformer model with

Current research focuses on systems that identify eye diseases using artificial intelligence. Hence, this research presents a novel eye disease detection

Efficient fusion transformer model for accurate classification of eye

To solve the problem that existing models ignore multi-scale information fusion understanding, this paper proposes an innovative deep learning model Local-Global Scale Fusion

Uruguay March 2025: Fiat (+44.9%) stays #1, BYD up 72.2% in

Fiat is the most popular carmaker in Uruguay in March. 5,804 new cars hit Uruguayan roads in March, a splendid 25.2% year-on-year improvement. The Q1 tally is up 14.8% to 15,477

EmMixformer: Mix transformer for eye movement recognition

To overcome this problem, we propose in this paper a mixed transformer termed EmMixformer to extract time and frequency domain information for eye movement recognition. To this end, we propose a

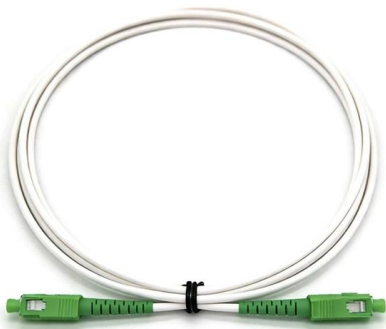

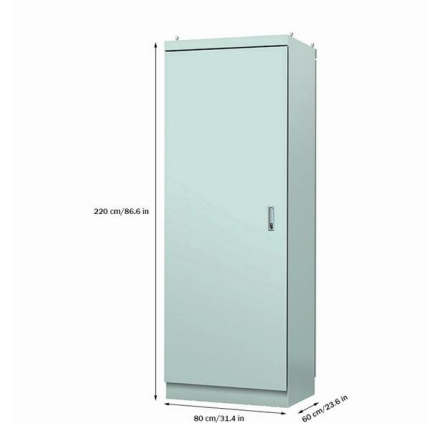

Improving Performance of Eye Movements Classification Using CNN

In the past decade, eye tracking has been a crucial approach for object selection in digital assistive technology as well as touchless digital signage. Accurate.

UniTR: A Unified and Efficient Multi-Modal Transformer

In this paper, we present an efficient multi-modal backbone for outdoor 3D perception named UniTR, which processes a variety of modalities

Multi-stage framework using transformer models, feature fusion and

To address these limitations, this study proposes a multi-stage framework for eye diseases (MST-EDS), including two stages: hybrid and stacking models in the categorization of eye
