

Uzbekistan buried optical fiber communication cable

Overview

The two countries are moving forward with a plan to lay a fiber-optic cable beneath the Caspian Sea to establish a connection with Azerbaijan. At present, virtually all Kazakhstan's and Uzbekistan's Internet traffic passes through Russian-controlled systems. The degree of localization of optical cable production is more than 40%, and the necessary raw materials are purchased from local manufacturers. Since 2011, Maybo has represented industry leaders including Fluke, Trimble, Anritsu, Keysight, Megger, FLIR, Fujikura, Tektronix and Olympus. The Republic of Uzbekistan has received approval for financing from the World Bank toward the cost of the Electricity Sector Transformation and Resilient Transmission (ESTART) Project and intends to apply part of the proceeds toward payments under the Contract Design, Procurement and Installation.
