

Vietnam Fiber Optic Broadband

Overview

Key Insight: Vietnam has significantly expanded its fiber optic infrastructure, reaching approximately 85% coverage across urban and rural regions by 2026. This expansion has been a key driver in increasing internet penetration, which now stands at 78%, reflecting widespread. VNPT, a subsidiary of Vietnam Posts and Telecommunications Group, operates in mobile information, providing services such as GSM, 4G, messaging, and more under the trade name VinaPhone. 2 billion, is growing due to rising high-speed internet needs, telecom expansions, and government support for digital transformation. By 2030, Việt Nam should have launched at least two new international submarine cable routes and established multiple AI-supportive data centres that meet international standards, with a Power Usage Effectiveness (PUE) rating not exceeding 1.
