

What is a flat tee for cable trays

Overview

The flat tee configuration is ideal for creating clean, structured intersections in complex cable installations. Key Features: Material: Hot dip galvanised steel for superior corrosion resistance and long-term strength. Equal tees, unequal tees and crossovers are available for light, medium and heavy duty cable tray systems with widths ranging from 50mm - 900mm. Designed for use with 300mm wide trays, this fitting allows for seamless three-way routing on a single horizontal plane.
