

What machine is the fiber optic cable from the network cabinet connected to

Overview

Installed on the exterior or interior of a home, the Optical Network Terminal (ONT) —also known as a modem— is the interface between the fiber optic cable and your home network. The fiber optic cable is in place from the local telephone exchange to a distribution point (commonly called a roadside cabinet), hence the name fiber to the cabinet. A fiber media converter, also known as a fiber to Ethernet converter, allows you to convert typical copper Ethernet cable (e. Once the PON cable plant is installed and tested, the network electronics can be installed.
