

What s the story behind cutting optical cable

Overview

The show follows the painful journey of Valeria Goldberg (played by Tessa Ía), a mother whose world shatters when her husband, Leo Saltzman (Emiliano Zurita), takes their two young children and disappears across Europe. The first fiber optic application or ideology was based upon a theory presented by Alexander Graham Bell in the late 1800s--that light could carry voice recordings through the use of wiring. Fiber optic cables are essential components in today's communication infrastructure. They transmit data as pulses of light through strands of glass or plastic, providing high-speed internet, seamless data exchange, and efficient signal distribution. In 'No One Saw Us Leave,' Leo Saltzman's downfall unfolds as he's forced to face justice and break free from his father's control A still of Emiliano Zurita playing Leo Saltzman in 'No One Saw Us Leave' (Cover Image Source: Instagram | @zurita7) Ever since ' No One Saw Us Leave ' premiered on.
