

# **What to do if the fiber optic light on your network router is red**

## Overview

---

Rebooting is the simplest and often the most effective solution: Turn off the router. Check Cable ConnectionsThe LOS light on your router indicates the status of your internet connection to the Internet Service Provider (ISP). However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. In this comprehensive guide, we will walk you through the common causes of a red light on your router and provide step-by-step instructions on how to fix it.
