This section provides an overview of the AI hubs in Venezuela, highlighting key cities and their geographical distribution. We currently have 7 data centers listed, from 3 markets in Venezuela (República Bolivariana de Venezuela). Save the trouble of contacting the providers yourself, check out our Quote Service. The Minister of Science and Technology, Gabriela Jiménez, reported that Venezuela's artificial intelligence (AI) policy is underway, which includes the construction of infrastructure and the development of a code of ethics and training programs on the subject. , Europe, and Asia rely on for computer vision, language models, and autonomous vehicles. Behind every AI data center is a massive energy infrastructure race involving natural gas, LNG terminals, pipelines, and industrial cooling systems — and the consequences may eventually reach global food prices, fertilizer costs, and your dinner table. Incubated at the Atlantic Council in 2016, the Digital Forensic Research Lab (DFRLab) is a field-builder, studying, defining, and informing approaches to the global information ecosystem and the technology that underpins it.
