

# Where is the 10 Gigabit fiber optic port on the router located

## Overview

---

The port on your modem or router should be located on the back or the side. Find a small hole (just the size of the cable is ok) where the cable goes out from the fiber network. Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled "ONT" or "Fiber"). Yeah just because a router has a 10Gbps port, doesn't mean it can route at 10Gbps. Not looking to max out 10Gbps, only want to be able to get more than 1Gbps out of it when the whole family is home streaming and all at the same time. To prevent damage to the fiber-optic cables, Cisco recommends that you keep the transceivers disconnected from their.
