

Which type of pigtail connector is best

Overview

The best pigtail for your needs depends on whether you're working with copper wiring or fiber optics, and selecting the right type—such as SC, LC, or ST for fiber, or insulated vs. A pigtail connector is a short length of wire with a factory-terminated connector on one end and bare, exposed wires on the other. It serves as a bridge, allowing technicians to repair specific connection points without disturbing the rest of the system. High-grade copper forms the core, chosen for its superior conductivity and heat resistance.
