

Will internet speed slow down after a fiber splitter splits the light

Overview

The direct answer to whether this action reduces internet speed is yes, it typically does. One of the most significant factors is the number of devices connected through the splitter. Beyond just speed, splitters can introduce signal loss, a key factor in understanding how they affect internet connectivity. When I try speed test with this setup, I get ~30 Mbps download speeds: []---router---PC []---MoCA device / empty In the above setup, the MoCA device paired at another coax port also got same speeds. But if you care about fast file transfers, gaming, or streaming, it can definitely hold you back.
