

Windows 10 connected to a switch cannot access the internet

Overview

The main guidance steps ask the poster to first rule out cable/port/router issues, then verify whether the adapter is getting a proper IP gateway (not an APIPA/169. x address), and finally reset the network stack (release/renew IP, flush DNS, and reset Winsock/TCP/IP) . I've got an issue with connecting my Windows 10 desktop PC to my router via a switch. When I couple the cables that lead to the router and the switch at the network box directly, I get no issues and the connection is stable. The thread is about fixing Windows 10/11 Ethernet connections showing "Unidentified network" and no internet, with the proposed cause typically being DHCP/IP or DNS failures despite the link being up. Also Perform Network Reset in Settings - Network and Internet - Status - Scroll down and click On Network Reset then Restart the computer.

Windows 10 connected to a switch cannot access the internet

Connect to Local Network But Not the Internet?

I want the machine to stay offline, but I'd like to be able to access network storage. I've tried to search for an answer but all I can find is people trying to fix non-working internet connections.
