

# **Wiring method between distribution box and circuit breaker**

## Overview

---

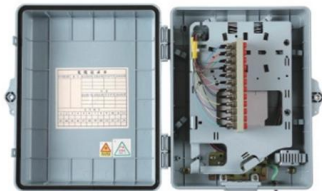

**Wiring Direction:** Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. The distinction between 1P and 2P circuit breakers plays a pivotal role in determining the appropriate protection level for various circuits. You will learn to build a safe, efficient, and professional electrical system today. Follow this guide for a clear and safe connection process: Before starting, always ensure the main power is turned off to avoid electrical shock. In this video, we'll guide you through the complete wiring diagram of a distribution panel.
