

# **Yellow tailpipe is gigabit**

## Overview

---

3ab is the original standard for Gigabit Ethernet over twisted-pair wiring, known as 1000BASE-T. Each 1000BASE-T network segment is recommended to be a maximum length of 100 meters (330 feet), and must use or better. Just as an Ethernet port can have differently colored lights, the cables themselves can also come in an array of colors. In previous lesson, we had discussed about Ethernet (10 Mbps) and FastEthernet (100 Mbps) Straight-through and Cross-over.
